PROFESSIONAL SUMMARY

Full-Stack Developer specializing in **Laravel, Angular, and React**, with hands-on experience building and maintaining production web applications, designing secure RESTful APIs, integrating payment solutions, and implementing AI-powered features.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Laravel (PHP) | Vue.js | Angular April 2025 – March 2026
Booking-Container, Best Container Line SARL — Full-time — Sale, Maroc

- Maintained and enhanced a production marketplace platform (Laravel, Vue.js):** diagnosed and resolved bugs, and developed new features based on business requirements.
- Designed and developed a new Angular dashboard** for operators to replace the previous system, using Tailwind CSS, REST API integration, Role-Based Access Control (RBAC), and automated data entry.
- Transformed Figma designs into reusable and responsive Angular/TypeScript** components integrated with backend REST APIs.
- Containerized applications with Docker** to standardize development environments, facilitate deployment, and improve team collaboration.

Front-End Developer — Next.js | TypeScript | Tailwind CSS October 2024 – December 2024
App24 — Freelance — Casablanca, Maroc

- Collaborated** on the development and maintenance of web interfaces using Next.js/TypeScript, with REST API integration and implementation of a multilingual user experience.

Full-Stack Developer — PHP | JavaScript | MySQL May 2024 – June 2024
Diaaland — Internship — Tanger, Maroc

- Developed** a complete blog platform (admin dashboard, article management, subscriptions, forms) using HTML, CSS, Tailwind CSS, JavaScript, PHP, and MySQL.

PROJECTS

Quvio — SaaS Quotation & Invoicing Platform github.com/Muhamedall/Quvio

- Full-stack application (Angular / Laravel):** customer management, quotation-to-invoice conversion, Stripe payments, PDF generation, and automated email workflows using n8n.
- Integrated** Google Gemini AI to automatically generate quotation descriptions through a secure Laravel API; authentication (Sanctum) and a real-time analytics dashboard.

Student Rental Platform github.com/Muhamedall/studentnest...

- Rental platform** developed with React.js and Tailwind CSS (secure authentication, profiles, favorites, reviews); Laravel backend with middleware for access control and security.
